Dear Mr. Easterly:

BP Products North America Inc. – Whiting Business Unit (BP) is submitting a complete revised application package for the CXHO Project (also known as Operation Canadian Crude (OCC)) for the Whiting Refinery. Therefore, BP hereby withdraws all previous submittals for this project as they will be replaced with a complete application package. To avoid confusion regarding which version of the application is most current, BP requests that IDEM remove all previous submittals from the application file and replace those submittals with the complete application package submitted on October 31, 2007. In addition, BP is requesting that the Whiting Public Library withdraw previous versions of the application. BP will provide a copy of the complete application package to the library.

The previous submittals that are being withdrawn and that should be replaced include the following:

- CXHO Project Air Permit Application, submitted July 31, 2006;
- Amendment 1, submitted August 22, 2006;
- Supplement 1, submitted October 19, 2006;
- Amendment 2, submitted November 22, 2006;
- Amendment 3, submitted January 24, 2007;

- Amendment 4, submitted June 5, 2007;
- Supplement 2, submitted July 19, 2007; and,
- Other correspondence associated with the permit application that was submitted prior to October 30, 2007 including, but not limited to, emissions calculations, email correspondence, and electronic files.

Since BP is withdrawing certified permit application submittals, a signed Part 70 Operating Permit Certification is also enclosed.

Please contact Natalie Grimmer at (219) 473-5417 if you have questions or comments regarding this request.

Sincerely,
